

AVATION PLC
("Avation" or "the Company")

SECOND NEW AIRBUS DELIVERED TO VIETJET

Avation PLC (LSE: AVAP), the commercial passenger aircraft leasing company announces the successful purchase and delivery of a factory-new Airbus A321-200 aircraft (the "Airbus") to Vietjet, the leading domestic and international new-age carrier of Vietnam. This aircraft is the second in a series of new A321 deliveries direct from the Airbus production facility in Hamburg, Germany.

The long duration operating lease terms are typical for an aircraft of this type. The Company has secured an asset backed senior debt facility to support the purchase. The aircraft was delivered on schedule.

The Airbus is equipped with CFM International CFM56-5B3/3 engines, with cabin seating for 230 passengers; the highest seat density configuration for an Airbus A321. It will be employed by Vietjet on its expanding route network of domestic and international destinations from multiple bases in Vietnam.

The Company's Chairman, Jeff Chatfield commented that "Avation remains delighted that Vietjet selected Avation to provide a series of aircraft after a rigorous selection process. We are now delighted to be delivering the second in the series of new aircraft to Vietjet. The addition of this aircraft brings Avation's fleet to 39."
